

ALUMAWOOD

ALUMINIUM SCREENING

INTERPON UNDERCOAT • ITALIAN IMAGE FILM
WESTERN RED CEDAR OR KWILA/MERBAU FINISH

Glass Outlet's focus is to supply the trade with the absolute best quality products at the best prices. Traditionally imaged aluminium has been sold in the market at a price point that restricts appeal to a large portion of home owners and builders. We are excited to release our new range of imaged aluminium western red cedar with a new framing system - without compromise to quality - Interpon undercoat used on all extrusion coupled with genuine Italian image film. This new system allows for flexibility of slat spacing and ease of install - choose whether to install onsite or pre-assemble panels/gates prior to install.

65X16MM SLATS

Western red cedar & Kwila timber image
Highest quality Italian film with Akzo Nobel base coat
5800mm lengths

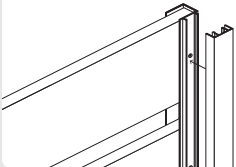

27X26MM SIDE FRAME

Western red cedar & Kwila timber image
Highest quality Italian film with Akzo Nobel base coat
5800mm lengths

ADVANTAGES

Concealed fixing: screws are hidden - clean finish!

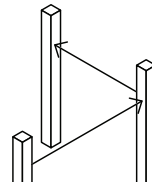

Low maintenance - unlike timber screening

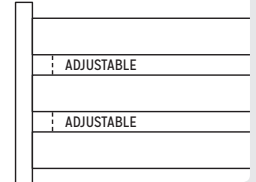

Cheaper than other similar systems

Install off angled posts

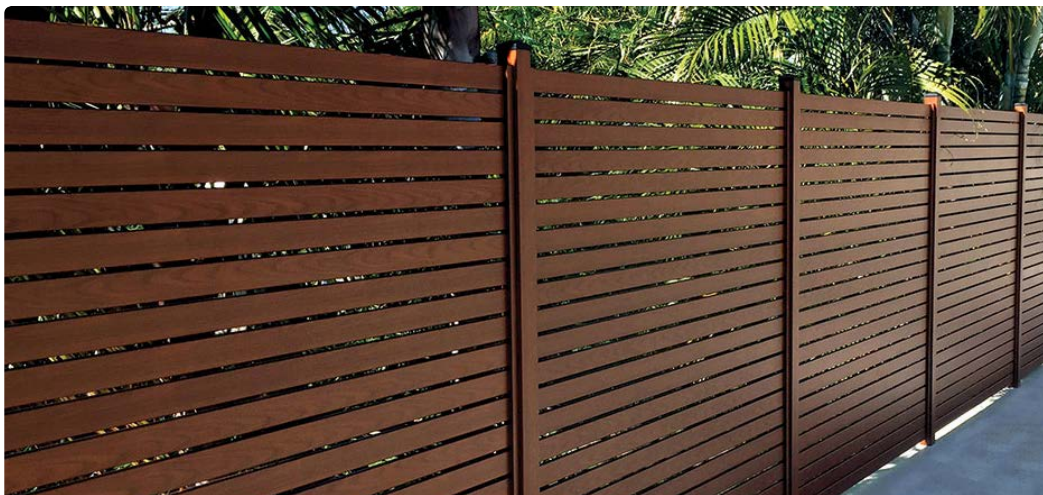

Adjustable slat spacing

Western Red Cedar

Kwila/Merbau

Easy installation!
